

SNIS Cerebral Venous and CSF Disorders

S U M M I T

February 29 – March 1, 2024
Honolulu, HI

After a highly successful first effort last year, the Society of NeuroInterventional Surgery's Committee on Venous and CSF Disorders is excited to announce the second Cerebral Venous and CSF Disorders Summit, to be held from February 29-March 1, 2024 at the Prince Waikiki Hotel in Honolulu, Hawaii. In 2024, we will build upon last year's program and progress, sharing experiences, ideas, and techniques in this rapidly growing space in neurointervention.

The Summit is intended to be a high-level strategic meeting of clinical, research and industry leaders interested in growing this novel domain of healthcare. We welcome all interested parties as we discuss ongoing research, new developments, and future trials/publications.

Participants will be able to attend in-person or virtually. The link for registration can be found [HERE](#).
